

## NECKLACE LENGTHS

**Chokers or Collar Necklaces:** At 12-16 inches these necklaces wrap very closely around the neck. This size usually sits above the collar bone.

**Princess:** At 17-18 inches the Princess is the most common necklace length in jewelry. These necklaces usually graze the collarbone and are often pendant necklaces. 19-20 inch necklaces will usually sit just below the collarbone but still above the neckline.

**Matinee:** At 20-24 inches the Matinee necklace will lay at or just below the center of the bust.

**Opera:** At 28-34 inches the Opera necklace will hang on or below the bust. The necklaces can often be wrapped into double strand styles or knotted.

**Ropes & Lariats:** At 35 inches and over, Ropes and Lariats are very long and can be doubled or tripled to give a layered effect, otherwise, they hang below the navel.
